Adiabatic cooling

Options and accessories

Below is a listing of the main TVFC options and accessories. If your required option or accessory is not listed, look no further than your [local BAC representative](#).

Flanges facilitate **piping connections** on-site.

Increase the coil's resistance against a harsh atmosphere.

Allow for operation without any anti-freeze agents and avoid a coil freeze-up risk at the same time.

Reducing noise at air **intake and discharge points** brings us closed to silent cooling equipment.

Increase the degree of redundancy, providing a higher backup capacity for your installation.

The recirculation pump helps to further cut down on water consumption.

This option integrates the adiabatic cooler's control system in your BMS system.

Cuts power to motor with **safety in mind** during inspection or maintenance.

Protects electronic components in the electrical panel during extremely cold temperatures.
