Filtration equipment

Water treatment and filtration equipment

Key benefits

- Long service life of your cooling system
- Optimal efficiency of your heat transfer media (fill or coil)
- Less maintenance and downtime
- Help optimize water treatment equipment

For optimal cooling performance and maximum system hygiene install also

- an automatic bleed control (BCP 0 D)
- water treatment equipment for liquid (BCP 2 D - BCP 3 D)
- a factory installed sump sweeper piping

Filters remove suspended solids in water. Filters work best alongside sump sweeper piping which increase water circulation and agitation in the basin preventing the solids to settle in the sump or basin.
