

Fill

Spare parts guide

Key benefits

- Unique sheet design
- Easy cleaning

Benefits

- original performance for lowest system operating cost
- minimum downtime
- maximum service life
- operational safety
- easy maintenance
- easy cleaning

We **design, develop and manufacture most of our fill types in house** to ensure the highest quality. Our R&D engineers subject the fill to all kinds of environmental and operational conditions like

- influence of air and spray water flow, pressure and distribution patterns
- installation and maintenance procedures to guarantee original performance and operational safety.

That's why you should choose for **original BAC fill** when replacing the heart of your cooling tower. Check in the table below what fill you need for replacement or upgrading your BAC cooling equipment.

BAC product type	Replacement fill	Upgrade fill
VXT	BACount bundles	
VTL-E	BACount bundles	
TXV	BACross , BACross bundles	BACross bundles
FXT	BACross	
S3000 previous generation	BACross , BACross bundles	BACross bundles , VersaCross
S3000D	BACross II	
PTE	Versapak	
IMT	Versapak , FRP fill	FRP fill
RCT	Versapak , FRP fill	FRP fill
FCT	Versapak	
FXV (cooler)	BACross , BACross bundles	BACross bundles
FXVE (cooler)	BACross II	
CXV (condenser)	BACross , BACross bundles	BACross bundles
CXVE (condenser)	BACross II	
FXV-D (cooler)	BACross II	
CXV-D (condenser)	BACross II	

BAC offers for all cooling tower types **high temperature fill alternatives**, depending on the type and the requirements

- in CPVC instead of PVC fill material
- in polyprop bundles instead of PVC bundled sheets

Check for high temperature applications also the need for change of other components. Contact your local BAC representative for more information.
